

Frontend developer with extensive 12 years of experience and good understanding of related areas such as backend and design. I have worked on various types of websites and web applications. My core skills include **HTML, CSS with preprocessors and UI libs, Git, Javascript, Typescript, react.js, react-native, redux, CSS-in-JS tools, Svelte, Three.js, AI tools and APIs**. My key focus is on code maintainability/extendability.

Experience:

10.2025 – 03.2026	LumooAI – Generative AI in Fashion startup: Full-Stack Engineer
<i>Typescript, react.js, Supabase, TailwindCSS, docker, GeminiAPI</i>	
Developed key parts of the platform from scratch, including UI/UX, core functionality, tests, and advanced workflows.	
06.2024 – 01.2025	Pivot Web and Mobile App: Senior Front End Developer > Full Stack
<i>Typescript, react.js, react-native, firebase, nodejs</i>	
Updated core modules of the web and react-native apps with new functionality(Sign In Flow, Messaging, multiple minor upgrades & code enhancement).	
04.2021 – 09.2023	Onomy Protocol: Lead Front End Developer
<i>Typescript, react.js, styled-components, D3.js</i>	
Developed responsive frontend from scratch for a presale token platform, web wallet, exchange, governance, bridge and other services within the web3 ecosystem. <u>This allowed the team to acquire \$11M+ of investments.</u>	
06.2017 – 04.2021	BetterLegal: Front End Developer > Lead Developer
<i>Typescript, nextjs, react.js, redux, redux-saga, styled-components, WebSocket, Stripe API</i>	
Solely developed a complete frontend for an internal CRM system that has given a possibility for managers to work with organizational data in real-time. Developed multiple company websites from landing pages to complex multi-form customer pages, integrated third-party services like Stripe payments, Zapier hooks, detailed analytics, etc. <u>As a result, company services sales grew multiple times.</u>	
09.2014 – 06.2017	Various small to large-size freelance projects
<i>HTML, CSS, angular.js 1.x, knockout.js, ember.js, react.js, vue.js, WordPress, Webflow, jQuery & more</i>	
Completed more than 30~ projects including corporate websites, landing pages, UI for Electron-based video editing software, social media websites, email HTML templates, custom WordPress themes, Webflow websites, etc.	

Education:
